

PROŠEK
RAINBOW ART

2025

JAROSLAV PROŠEK

hidden talent of Czech glass art

Born in 1986, Beroun, The Czech Republic

He specializes in creating unique sculptures from glass, bohemian crystal, wood, 6500 years old subfossil oak, stainless steel, bronz and marble.

At the beginning of his career he got the opportunity to learn by the side of renown Czech sculptor Vlastimil Beránek in his atelier. Now he works in his own atelier in Česká Lípa.

Some of the sculptures made by Jaroslav Prosek are simple shaped, others hold a deeper meaning and are inspired by motives of the sea, yachting, universe, movies and nature. Prosek uses several techniques for creation of his artworks: melting in mold, grinding, engraving. Techniques he uses is mostly depending on the shape and story, he wants to create.
